Professional Summary

Full-Stack Developer with a Vocational Master's in AI and Big Data. I build web applications end to end with React, TypeScript and Python (FastAPI), as well as Node.js and PHP (Laravel), and combine them with applied AI and data: LLM integration (Claude API, RAG), machine learning models, computer vision and analysis with SQL and Power BI. With tests, CI and code review on every change.

Technical Skills

Frontend: JavaScript, TypeScript, React, Next.js, HTML5, CSS3, Tailwind CSS, Vite, responsive design

Backend & Databases: Node.js, Python (FastAPI), PHP, Laravel, REST APIs, SQL (JOINs, CTEs, window functions), MySQL, PostgreSQL, Supabase

AI & Machine Learning: scikit-learn, TensorFlow/Keras, statsmodels, classification, clustering, time series, anomaly detection, computer vision (YOLO, OpenCV), NLP (spaCy), LLMs, Claude API, RAG, LangChain, embeddings, Hugging Face, Ollama, Gradio, Streamlit

Data & BI: Python, Power BI (DAX, Power Query), Excel (pivot tables), pandas, NumPy, Apache Spark, Matplotlib/ Seaborn, Jupyter, Tableau, KNIME, ETL, KPIs, dashboards, data visualization, data cleaning and quality, exploratory data analysis (EDA), reporting, business intelligence

DevOps & Tools: Docker, Git/GitHub, CI/CD (GitHub Actions), testing (pytest, Vitest, PHPUnit), Nginx, Cloudflare Workers, AWS (Lightsail), Vercel, Railway

Methodologies: Clean Architecture, code review (PR review), collaborative Git workflow (GitHub Flow)

Professional Experience

Full-Stack Developer (collaboration), TuyTu Tech – Remote — 2026 – Present

Platform that protects images against deepfakes through adversarial perturbations targeting generative AI models.

- Built the public website (tuytu.tech) with React 19, TypeScript, Vite and Tailwind on a single Cloudflare Worker (assets and API), with Supabase, Zod, Turnstile and a strict CSP, backed by more than 1,500 automated tests (Vitest).
- Built the dashboard (React, TypeScript) with multi-file upload and batch processing against a Python/FastAPI API, with request cancellation and per-file error handling.
- Joined the Core team to develop the preventive protection algorithm; I review code in PRs and maintain CI tests with mocks of heavy ML models, in a collaborative GitHub workflow.

Web Developer Intern, Novelda City Council – Novelda, Alicante — May 2025 – July 2025

- Developed and maintained websites for municipal services (youth, culture and other areas), structuring content with a focus on user experience.

Education

Higher Vocational Degree in Web Application Development, I.E.S. Poeta Paco Mollá, Petrer — 2023 – 2025

Vocational Master's in Artificial Intelligence and Big Data, I.E.S. Antonio Sequeros, Almoradí — 2025 – 2026

AI-Assisted Development from Zero to Production, Online course — 2026

MATLAB Onramp, MathWorks — 2026

Featured Projects

DataInsight AI – Python · FastAPI · Celery · Next.js · TypeScript · Supabase · Claude API · statsmodels · scikit-learn

From CSV to report with no code: charts adapted to the data, Claude-generated insights with every figure validated against the data, Holt-Winters forecasting with a 95% interval and backtested error (WAPE), or Random Forest when there are no dates, plus a PDF report. 480+ tests, CI on GitHub Actions and a public demo with no sign-up. github.com/BorjaEscolanoMartin/DataInsightAI

RAG Chatbot with LangChain – LangChain · Chroma · Streamlit

RAG over PDFs with LangChain, Chroma (MMR retrieval) and sentence-transformers embeddings; swappable LLM between Gemini 2.5 Flash-Lite and local Ollama (Llama 3.2, Qwen 2.5). github.com/BorjaEscolanoMartin/rag-chatbot-langchain

Object Detection with YOLO – YOLO11 (Ultralytics) · OpenCV · Streamlit

Real-time inference and detection (video/webcam), queue management and a dedicated fire-detection page (retrained model, mAP50 ≈ 0.65) in a Streamlit interface with tracking. github.com/BorjaEscolanoMartin/computer-vision-yolo

Pets · Pet Boarding Platform – Laravel 12 · React 19 · Tailwind · Docker · AWS

Final degree project: authentication and roles, bookings, real-time chat and maps (Google Maps); 23 tests (PHPUnit), Docker and Nginx on AWS Lightsail. github.com/BorjaEscolanoMartin/PlataformaPets

Email Automation Matrícula – Robot Framework · Python · openpyxl

Enrolment ETL: reading PDFs and QR codes, Excel reports (openpyxl) and automated email replies (IMAP/SMTP), with a full mail infrastructure in Docker. github.com/BorjaEscolanoMartin/EmailAutomationMatricula

Power BI Sales Dashboard – Power BI · DAX · Power Query · Tableau

Sales and profitability dashboard with DAX measures (Profit, Margin), maps by country and by period; Tableau dashboard and story published on Tableau Public. github.com/BorjaEscolanoMartin/powerbi-ventas-globales

Previous Work Experience (Other Sectors)

Customer Service, Cashier and Restocking (petrol station), J.R. Vidal Rico, S.L. 2022 – 2025

Regional Delivery Driver (route planning and delivery deadlines), Luque y Milán, S.L. 2019 – 2022

Production Operator (marble industry), Crevisa, S.L. 2014 – 2018

Languages

Spanish (native) · Valencian (advanced) · English (intermediate)

Additional Information

Driving licence (category B).
